TO WHOM IT MAY CONCERN

Mr. Natansh Bajpai has shown immaculate talents in computer science and I would wholeheartedly recommend him for postgraduate studies in your institution. I have taught him for two semesters and in that period he has shown keen interest in this course.

He has represented our college in many events and also organized inter-college events which have been a great success. He has handled many rough situations calmly and met the deadlines without compromising the end goal. The candidate has always been ready to help his colleagues proving his mettle not only as someone who has great interpersonal skills but also leadership qualities.

Taking all this into account I strongly recommend Natansh for the program. He will prove to be an excellent addition to this program.

Regards,
